Mounting Board for 19" Rack Enclosures

ECUMB

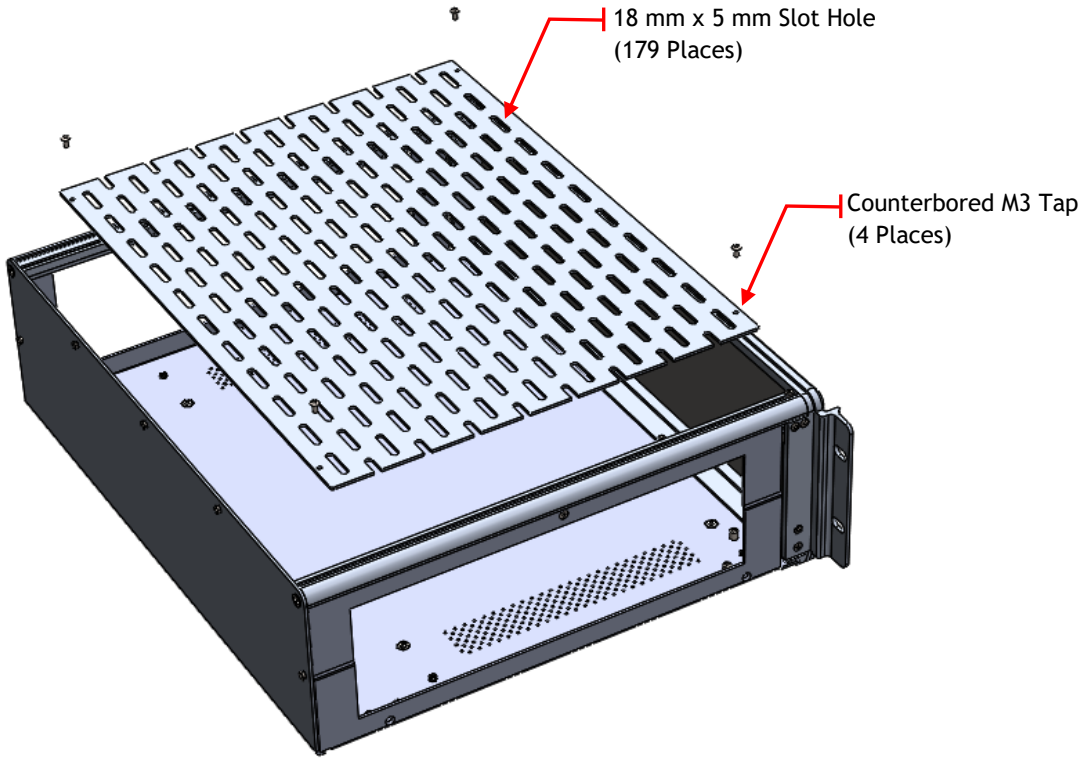

Description

The ECUMB Mounting Board provides a surface for assembling electronic components such as PCBs, development boards, and power supplies. The ECUMB is made of solid, unanodized aluminum and designed to fit in the EC2U, EC3U, and EC4U 19" Rack Electronics Enclosures (not included) using the M3 taps located on the interior of the enclosures.

Installation

1. Open the cover of the electronics enclosure as described in the EC2U, EC3U, or EC4U spec sheet.
2. Use the four M3 screws and 2 mm hex key (all included with enclosure) to secure the mounting board in the interior of the enclosure.
3. For the EC4U enclosure, use three additional M3 screws (not provided) and the provided 2 mm hex key to secure the mounting board to the three M3 taps in the center of the enclosure.

Securing Mounting Board in EC3U with Four M3 Taps
