Blank Printed Circuit Board for EEA Extrusion Series Housing

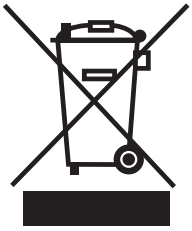

EEAPCB1

Description

The EEAPCB1 Customizable PC Board is designed to slide into the EEA11, EEA14, and EEA17 Extrusion Enclosures and fit with edge-mounted BNC or SMA connectors at each end. The large grounding bars at the top and bottom of the board ensure a proper electrical connection with the enclosure and help to shield the circuit from external noise. The PCB incorporates footprints to allow placement of resistors, capacitors and inductors for the creation of customized RCL circuits. It features four component groups in series, each component group contains 5 elements in parallel, and is constructed from FR4 130tg with gold-immersed electrodes.

Specifications

- Board Size is 2.30" × 0.99" (58.4 mm × 25.1 mm)
- Board Thickness: 0.06" (1.6 mm)
- Compatible with the EEA11, EEA14, and EEA17 Extrusion Housings
- Compatible with BNC or SMA PCB Edge-Connectors
- 4 Component Groups per Board
- 5 Footprints per Group for Resistors, Capacitors, and Inductors
- 5 Footprint Sizes per Group: Wirewound, 5 mm × 5 mm, SMT1210, SMT1206, and SMT0805
