Electrical Tube Filter Kit

ET1

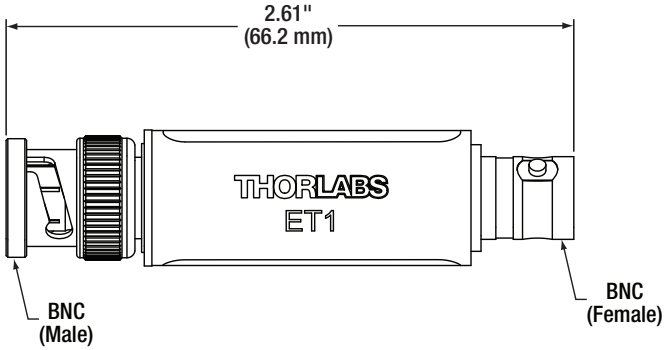

Description

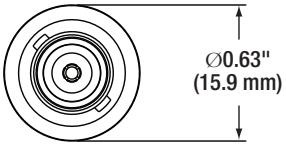

The ET1 Electrical Tube Filter Kit is a BNC terminated Electronic Filter Housing allowing the customer to create their own small electronic adapter or terminator that can easily be taken apart.

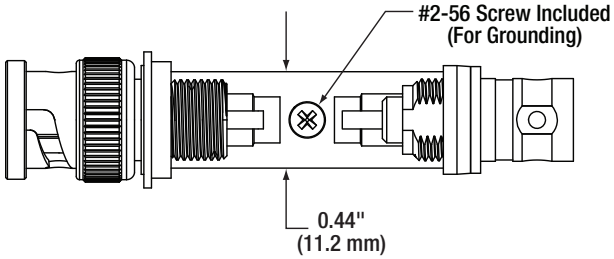

Specifications

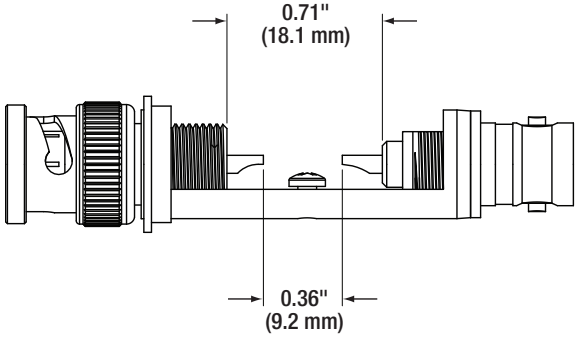

Aluminum Tube Housing around a Stainless Steel Body that holds 2 BNC Connectors (Male and Female). The main body offers a thread for grounding any electronics to the main body. The tube offers space for direct wiring or a small form factor PCB (10 x 15mm).
