Breadboard for 19" Rack Enclosures

MSBU3038

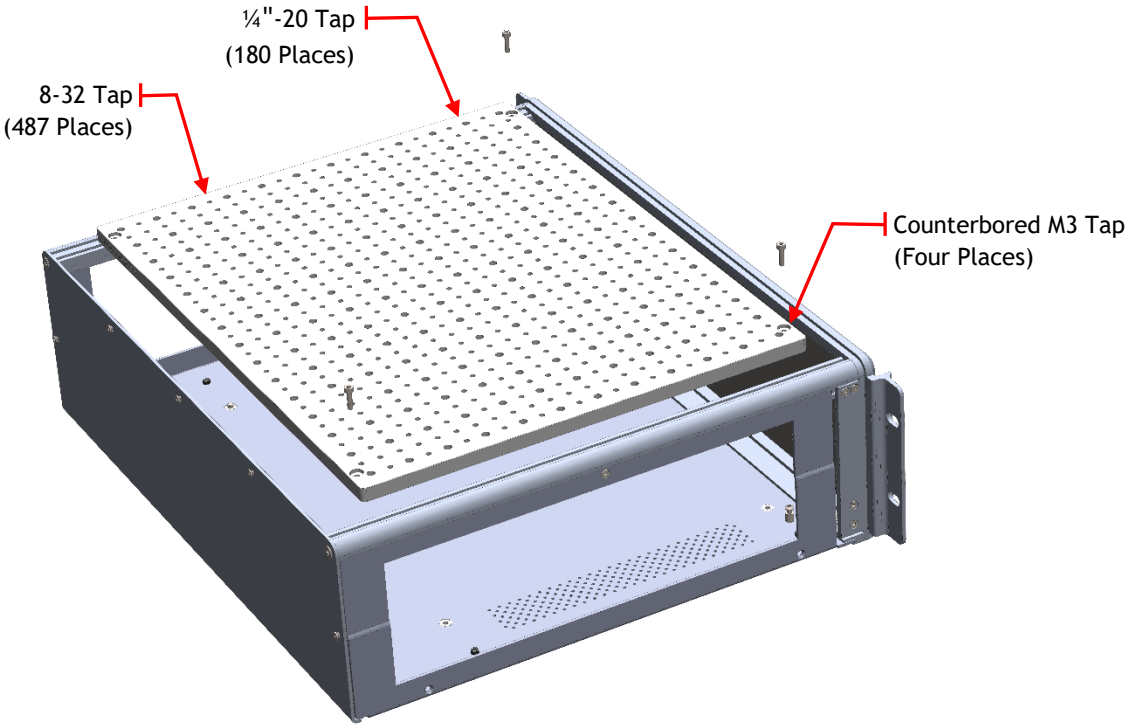

Description

The MSBU3038 Breadboard is a solid, unanodized aluminum breadboard designed to fit within the EC2U, EC3U, and EC4U 19" Rack Electronics Enclosures (sold separately). The breadboard has a high-density hole pattern containing 8-32 and 1/4"-20 taps with 1" hole spacing. There are four M3 taps located on the breadboard for mounting to the interior of the EC2U, EC3U, or EC4U enclosures.

Installation

1. Open the top cover of the electronics enclosure as described in the EC2U, EC3U, or EC4U spec sheet.
2. Use the four M3 screws and 2 mm hex key (all included with enclosure) to secure the mounting board inside the interior of the enclosure.

Securing Breadboard Inside EC3U Enclosure with Four M3 Screws
