Breadboard for 19" Rack Enclosure

MSBU3038/M

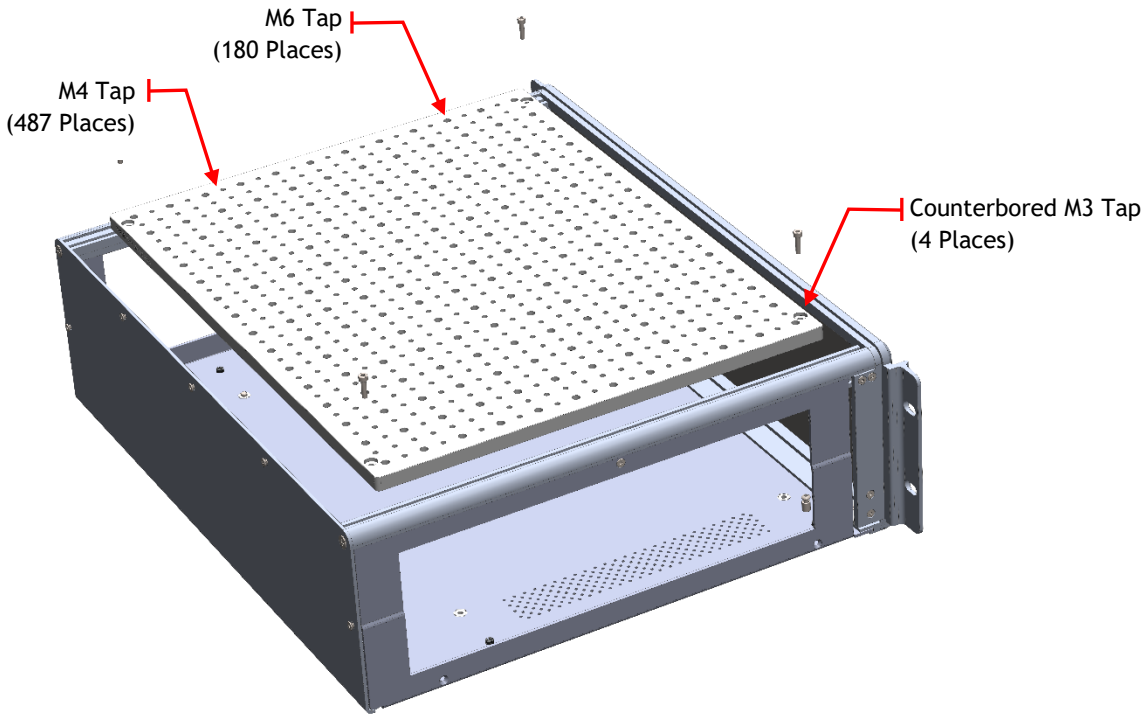

Description

The MSBU3038/M Breadboard is a solid aluminum breadboard designed to fit within the EC2U, EC3U, and EC4U 19" Rack Electronics Enclosures. The breadboard has a high-density hole pattern containing M4 and M6 taps with 25 mm hole spacing. There are four M3 taps located on the breadboard for mounting to the interior of the EC2U, EC3U, or EC4U enclosures.

Installation

1. Open the top cover of the electronics enclosure as described in the EC2U, EC3U, or EC4U spec sheet.
2. Use the four M3 screws and 2 mm hex key (all included with enclosure) to secure the mounting board inside the interior of the enclosure.

Securing Breadboard Inside EC3U with Four M3 Screws
